

From MacDailyNews.com

**Apple today released Aperture 1.5.2 Update** which addresses issues related to overall reliability and performance in a number of areas, including:

- Contact sheet printing
- Smart Albums
- Watermarks
- Lift and stamp
- Image export
- Versions created using an external editor

This update is recommended for all Aperture users.

Also an update to RAW Support (1.0.1)

I'll check them out and report on the next ApertureCast

Also a report on Aperture on a 24" iMac from Scott Edwards in Australia.
